AMGEN

About AMGEN

Amgen one of the pioneers of modern biotechnology, Amgen's core focus is to discover, develop, and deliver innovative medicines. Now, nearly 4 decades later, Amgen is building upon our biotechnology heritage and expertise to develop and manufacture high-quality, reliably supplied biosimilars. We have made a significant commitment to biosimilars, with 11 products in development. AMGEN have invested more than \$2 billion across our portfolio of 11 biosimilar candidates and marketed products intended to target serious diseases. We have reached a unique position: we have a deep and growing portfolio of innovator products as well as an already-successful commitment to developing and marketing biosimilars.
